José Hernández Moya

Fullstack Developer .Net | Tech Lead

With over ten years of experience, I am a Full Stack Developer skilled in creating scalable, user-focused solutions. Proficient in front-end frameworks like Bootstrap and Kendo UI, and back-end development with T-SQL and .NET. Passionate about leveraging tools like RPA and ECM to drive efficiency and automation. A proactive leader and problem-solver, dedicated to delivering high-quality software, optimizing APIs, and staying ahead of industry trends to continuously add value.
